SONMAK

Perfect solutions
to endless needs...

HAKKIMIZDA

SONMAK 1975 senesinde Ankara'da kurulduğu günden bu güne her türlü doğal taş, mermer, granit, beton ve asfalt kesiminde kullanılan elmaslı kesicilerin ülkemizdeki en büyük üreticisi olmayı başarmıştır.

100'den fazla deneyimli çalışanı ve 14.000 m² üretim alanı ile müşterilerine en iyi kaliteyi en ucuz fiyata sağlamayı hedef edinmiştir.

ABOUT US

Our company was founded in 1975 in Ankara/Turkey. Since then, SONMAK is the greatest manufacturer and trader of diamond tools for natural stones, marble, granite, concrete, asphalt, etc. of Turkey. With a production hall which is 14.000 m² and employees over a hundred, we are working for catching the best quality with best price.

KATRAK LAMASI

SONMAK katrak lamaları traverten, bej ve emprador kesimlerinde sunduđu uzun kullanım 3mr3n3n yanı sıra hızlı ve d3ř3k maliyetli kesim yapılmasını sađlar. Kesilecek tařın cinsine g3re 3retilen konik sandviç ve trapez sandviç segmentlerimiz ile y3ksek kesim hızları ve kesim kalitesi g3vencemiz altındadır.

GANG-SAW BLADES

SONMAK gang-saw blades have long working lives that ensure the fast and low cost cutting of natural stones such as marble, beige and travertine.

Conical gang-saw segments are diamond segments that widen as they move away from the body. Produced with special technologies, these segments allow for free Cutting and thus have higher cutting speeds.

ELMAS TEL

En son teknoloji kullanılarak üretilen elmas tellerimiz fiyat/performans açısından müşterilerimize maksimum fayda sunmaktadır. Bej, traverten ve benzeri taşların kesiminde kullanılan tellerimizin yanında kauçuk kaplı granit ve beton telleri de imal ettiğimiz ürünler arasındadır.

DIAMOND WIRE

Sintered diamond wires are among SONMAK's prestigious products and can be used in marble and granite quarries for removing and shaping blocks.

SİLİM VE PROFİLLER

Müşterilerimizin her türlü gereksinimine cevap verecek şekilde üretilen silim ve profiller, her tür taş yüzeyinin düzeltilmesini ve nihai kenar şeklinin verilmesini sağlar.

GRINDERS AND PROFILES

Designed to meet all customer needs, SONMAK grinders and profiles are used in the calibration of stone surface and in making the side design.

DAİRESEL TESTERE

Taş kesiminde en önemli faktör, kullanılan segmentin kesilecek taşa uygunluğudur. SONMAK, keseceğiniz taşa en uygun segmenti üreterek, hızlı ve düşük maliyetli kesim yapmanızı sağlar.

CIRCULAR SAW

The most important factor in stone cutting is determining the suitable segment type according to the stone at hand. Not only does the segment have to wear the stone but the stone has to abrade the segment as well. This procedure enables new diamonds to surface where by enabling a proper cutting process. SONMAK CIRCULAR DIAMOND SAWS are manufactured in different sizes and shapes using the latest technologies in order to cut all stone types with long lifes.

Proper cutting speed must be determined for each material individually since peripheral speed varies with characteristic of the material to be cut. A very low speed results in segments becoming dull, preventing the blade from cutting. On the other hand a very fast cutting speed causes diamond particles to burn or break-out. In both cases, the saw blade's life will decrease considerably.

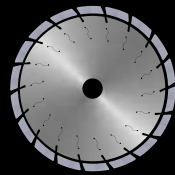

KAROT MATKAPLARI

SONMAK karot matkapları, standart ve donatılı beton kesimlerinde yüksek hız ve ömür verecek şekilde dizayn edilmiştir. Tüm karot matkaplarımız çok çeşitli çap ve uzunluklara sahip oldukları gibi, her türlü makinaya da uyumludur.

CORE DRILLS

SONMAK core drills are designed to ensure high speed and long life in the cutting of all types of concrete (*standard and re-inforced*) All SONMAK core drills are compatible with leading machines and come in various diameters and lengths. SONMAK core drills have long lives and are manufactured based on the performance criteria that will best meet the customer needs to ensure customer satisfaction.
